EXECUTIVE SUMMARY

This document is an intermediate release of the deliverable D8.1, Innovation Management Plan (IMP), reporting on the activities performed in task T8.1 (until M36) of the CAREPATH project, as per request of the reviewer of the project ¹. The final release of D8.1 (activities until M48) will be delivered by the end of the project.

This deliverable gives an overview of the main result of the CAREPATH project so far. It also illustrates the intentions of the Consortium partners on how they plan to use these results in the exploitation process at the end of the project and beyond its lifetime.

Different possibilities of exploitation models are presented, but until now the Consortium has not decided on how to proceed with the commercial exploitation because of the delays that the project has suffered.
